**Board of Trade
Banquet Monday**

The Didsbury Board of Trade will hold their first meeting and banquet at the Rosebud Hotel on Monday evening at 8 o'clock.

Dr. Carpenter, principal of the School of Technicology, Calgary, will be the guest speaker and will give his most interesting lecture, "Down North". Dr. Carpenter recently made a trip to the north country and obtained a number of moving pictures which he will show.

Everyone interested in board of trade work is invited to attend. The tickets for the banquet will be 50c each.

Burglars Break Into Westcott Store

Thieves broke into the Westcott store Monday night and got away with \$15.00 or \$20.00 in silver.

Unable to break in at the door the thieves entered the store by the warehouse window. They must have worked very quietly, as Mr. Moir was sleeping on the premises, but nothing was disturbed.

I.O.D.E. Honors Members.

The regular meeting of Mons Chapter of the I.O.D.E. met at the home of Mrs. Lowrie on Monday evening.

After the meeting a bridge party was given in honor of Mrs. Ward Keith, who is leaving the district, and three brides-elect, Miss Saugstead, Miss Grant and Miss Nellie Wilson.

The guests of honor were presented with Crown Derby teacups and saucers by the members of the Chapter.

Music Festivals And Spring

The music festival season, whether by accident or design, coincides with spring in this Western country; and it is peculiarly fitting that it should. The two seasons are highly compatible.

Spring is essentially the season of songs of the joy of new birth, of life freed from the trammels of winter, of new hope and refreshment, of the seed-time and the filling and bursting of the buds, of the urge to new endeavor, of faith and a more expansive contentment. The pagans of old celebrated its advent with rites in which music was the vehicle of expression of that mirth and jollity the softer sun inspired.

The association of spring with song is universal. It has been universal down the ages, for in the spring, nature awakes from long hibernated sleep to the notes of its own orchestra and the song of its own choristers. What more fitting than that the soul of man should "blossom in singing" when spring brings life anew to prairie and woodland?

The music festival idea has given point and purpose to man's urge to vocalize the finer aspects of his emotional existence and experience. The remarkable growth of that idea in prairie communities, indicated in the consistent expansion of the festivals, is one of the most reassuring evidences of the enduring quality of the social organization these communities reflect. The joy of singing and the love of music, emotions never realized nor appreciated to the full unless they are shared, are infallible knitters of closer ties of friendship and fellowship. The association thus cemented inures to a deeper sense of that brotherhood of man which makes the whole world kin.

Song is of the heart and of the spirit—a weaver of the very fabric of community life. Music symbolizes the harmony of which that life is compact and without which it cannot long survive. It is significant that visitors to rural communities of the prairie west have been struck with the fulness of the social life obtaining in them, despite the lack of those adjuncts which are considered indispensable to the amenities of city life. This feature has been remarked upon particularly in relation to the remoter communities where residents have learned to rely upon their own resources and their own privileges for social organization, and where, in co-operative endeavor, they have managed to add spice and variety to their ordinary routine.

Music and song have thus become the greatest adjuncts of peace and contentment among the scattered communities of the far-flung prairies. They have contributed greatly towards the alleviation of the pangs of disappointment. They have made hardship less onerous, reaction less disruptive. These annual festivals, bringing, as they do, urban and rural dwellers of kindred tastes together, and demonstrating, as they do, a heretofore common to the diverse peoples composing the population of the western provinces, are contributing much towards developing that fellowship which, wider than the communal, reaches through the provincial into the national life.

It is right that the winter should be a season of preparation and practice, but it is essential that the festivals should be of the spring. That's where they belong.

Stowaway Makes Good

Boy On Antarctic Ship Has Become Popular With Crew

Fourteen-year-old Enmar Lumberg, who stowed away on the Antarctic factory ship Southern Princess, has made good. Enmar was discovered when the ship was on her way to the Antarctic. He had crept into the ship the night she left Sandefjord, Norway, and hidden under a barrel until hunger forced him to reveal himself. The skipper assisted the fat's pluck, and made him assistant steward. His quickness and keenness soon made the boy extremely popular with all the crew. In dark hours after a hurricane had smashed the rudder of the Southern Princess and it seemed certain that she would be lost with all hands, Enmar proved his worth. His light cheery manner and utter disregard for danger helped the morale of the older men.

According to experiments in Italy, hens fed whole wheat flour had more fertile eggs than hens fed white flour, and the chickens from such eggs were larger and healthier.

In their natural state the ruby and the sulphure are identical in composition, their difference in color being due solely to naturally included metallic oxides.

Shortness of Breath Weak, Sinking Feelings

If going up stairs, climbing hills, walking too far; if the least exertion causes you to stop to get your breath, or if you have weak, sinking feelings, it is time for you to stop and think as to the cause of your trouble.

What you should do is take a course of Milburn's Health Nerve Pills. They tone up and strengthen the vital organs so as to prevent any harmful attacks of disease.

Ask your druggist for Milburn's H. & N. Pills.

Wolves Kill Caribou

Trapper Brings Tale Of Wanton Destruction From North

Bringing stories of terrific onslaughts made by roving packs of wolves while the caribou were migrating, Edwin Sanguist, trapper of the sub-Arctic, reached The Pas, Manitoba, following nine months of travel west of Churchill.

Sanguist, with his partners, John Vanhook and Charles Hendon, left last July with supplies for winter trapping 150 miles north of Brochet. They travelled by canoe, and reached their headquarters on Oct. 11. During the trip they saw no caribou. But on the morning after their arrival, they went outside to find the migrating herds passing their door. Thousands of animals were moving south. Following close on their heels were packs of from five to 35 wolves. Sanguist said the wolves in many cases killed purely for sport, and when they were not dead to knock down, they turned on each other.

The tall-growing hybrid dolphins, so popular in Canadian gardens, can be raised from seed easily, but as they do not come true, anyone wishing to increase the stock of a special plant must do so by division of the roots of that plant.

Sky Changes Coloring

At Different Altitudes

Moscow Experts Studying Records Taken In Stratosphere Flight

Remarkable evidence of changes of color in the sky at different altitudes in the stratosphere is one of the results which have been obtained by the experts in Moscow who are studying the records left by the crew of the Soviet stratosphere balloon Statostat which crashed after reaching the record height of over 13 miles. Investigations are being carried on under the direction of M. Thomson, the semi-scientific worker of the Central Weather Bureau. The gondola of the Statostat carried numerous instruments for making automatic observations at various periods of the ascent and descent.

Among the data on which the experts have been working are twelve photographs taken at different altitudes, and twenty-seven spectrum observations.

The results of the preliminary investigations are stated to show that the sky gradually changes color as follows: 5,280 miles, marine blue; 6,830 miles, dark blue; 8,080 miles, dark violet; 11,810 miles, dark violet marine; 12,060 miles, dark violet grey; 13,470 miles, black grey.

This evidence bears out observations made by Professor Piccard, the Belgian balloonist, and also by the crew of the Soviet Statostat U.S.-S.R., which made a previous high record attempt, who recorded that the sky at 11,810 miles high was "very dark violet."

The experts state that valuable records of sky colors were made by M. Vassenko up to the time when disaster overtook the balloon at a height, apparently, of 7,400 miles on the downward descent.

China's Guide For Pilots

Lighted Clock Greets Ships Entering Port At Shanghai

Instead of Liberty's flaming torch to greet arriving vessels, China has erected a memorable landmark in a clock, thirty feet in diameter. Visitors entering the Whangpo river off the Woosung Forts are now struck by the new life in the harbor.

Figures from zero to 15 cover the rim of this gigantic face which at night is illuminated by Neon tubes visible for at least a mile out in clear weather.

The hands of the clock are geared to an automatic mechanism for registering tide depths. The device was put into position by the Whangpo Conservatory Board as a gift to skippers.

The base of the dial is a great arrow, whose position shows whether the tide is rising or falling. The complete outfit, rising high above the Woosung flats is a memorable sight to visitors, particularly when it shines in welcome out of the darkness.

Tenants Steal Building

Remove It Piece By Piece To Split Landlord

Charged with stealing a building, several tenants of a row of flats have been arrested in Kladet, Poland. Back of this is a case of revenge against the tenants' landlord. Following a long series of clashes between the occupants and the owner, the tenants got together and decided to steal the building. Stone by stone, door by door, with saw by window, they removed their flats several miles away and reconstructed them. Calling to collect his rents the landlord found an empty space where his flats had been. He accused the village and a search was started. After many days the flats were found. Inside were the tenants, enjoying life without the shadows of a landlord's calls. The rate owner had them arrested, but is puzzling how he will get his building back where it belongs.

Of recent years, a number of promising smooth-skinned barley has been produced by different plant-breeding institutions, including the Dominion Experimental Farms, but these varieties have not yet been tested for a sufficient length of time to say which is the most desirable. For the present, however, the variety called Velvet is favoured in Eastern Canada, while Regal appears most promising in the West.

More Tobacco for the Money! and POKER HANDS, too with TURRET FINE CUT!

Wise smokers who "roll their own" cigarettes are making 10c do a bigger job than ever before. They're using Turret Fine Cut—the mild, cool, fragrant tobacco that gives them more and better smokes for the same money and Poker Hands to exchange for free gifts.

A turn to Turret Fine Cut is a turn in the right direction... greater economy, greater pleasure and the extra value of Poker Hands. Don't wait!

Average Value Of Canadian Farm Stock Has Increased

The average value of farm land in Canada in 1933, including both improved and unimproved land as well as dwelling, houses, barns, stables and other farm buildings, is placed at \$24 per acre in an estimate recently issued by the Canadian government. This shows no change since 1932. Average farm land values range from \$63 per acre in British Columbia to \$16 per acre in Manitoba, Saskatchewan and Alberta.

Average values placed on farm livestock are: Horses, \$52; milch cows, \$31; other cattle, \$17; sheep, \$4; swine, \$8.58. The changes from 1932 values are slight except in the case of swine, which have almost doubled, having increased from \$4.73 to \$8.58. In the same period the average value of wool increased from five to ten cents a pound. Total value of all farm livestock in 1933 amounted to \$465,135,000, an increase of about \$27,000,000 over 1932. The value of farm poultry is placed at \$32,450,000, a slight falling-off from the value in the previous year.

Average wages of farm hands during the summer season were \$17 per month for men and \$10 per month for women, board and bedgings, in both cases, being furnished by the employer. Counting in the value of board the average wages for men were \$32 per month and for women \$22 per month.

Iceland's capital is named Reykjavik, meaning smoking harbor, after the hot springs, which are so prevalent in the country.

Cattle are now branded pointedly with a chemical that removes the hair and leaves the skin white.

"Made In China"

Oriental Make Up Irish Linen Handkerchiefs For American Trade

Handkerchiefs for sale in Atlantic City bearing the tickets, "Pure Irish Linen," and "Made in China," attracted a visitor that he promptly wrote to the Belfast Times about it. In reply John Gilliland of Belfast, Director of the Irish Linen Guild declared that China is now buying thousands of pieces of linen to be made up into handkerchiefs and embroidered for the American trade. "Although Irish linen is used," he said, "owing to U.S. Customs laws, articles coming into that country can only be accepted if they are marked with the place of origin—that is China. It is really a question of China obeying the Customs laws. As a matter of fact Ulster manufacturers are keeping a good grip on the handkerchief trade in America."

Have Never Seen Rain

Because of drought there are children ten years of age in South West Africa who have never seen rain. They have been discovered by the Minister of Lands who reports that rain has not fallen for seven years in some districts.

Future World Peace Will Be Assured When Nations Learn To Live And To Let Live

The following article, being an editorial on war, appeared in a recent issue of the *Western Magazine*.

Anyone who believes that from the beginning of time the World War was fated to come is in an illogical position even to hope for a warless world. But he who regards all wars as a direct consummation of policies of participating nations, can build an optimism around a conviction that men, being thinking animals, need not forever blunder into bloodshed but some day will consciously choose courses of action that prolong peace.

Wars do not happen suddenly. They are made in time of peace. Then popular desires are shaped into national policies which conflict and eventually clash with those of other countries.

It is interesting to conjecture what might have happened if, say in 1900, the people of the 27 nations that were drawn into the bloodbath of 1914-18 had clearly realized that the policies then being born would lead to that conflict. Perhaps, in considering whether the national aims should be pursued unmodified, far-seeing statesmen might have started the case thus:

"These policies will lead to war. That war will take 20,000,000 lives, cost \$400,000,000,000, snap the morals of civilization, precipitate a world-wide depression.

"If these policies are not pursued, 30,000,000 lives will be saved, civilization will proceed without interruption. And with the \$400,000,000,000 we shall be able to give a \$2,500 house, furnished with \$1,000 of furniture, and five \$100-a-week in every family in the United States, Canada, Australia, Great Britain, Ireland, France, Belgium, Germany and Russia; to put a \$5,000,000 library and a \$10,000,000 university in every city of 20,000 population in the countries named; and, furthermore, establish a fund which at five per cent. interest will for all time pay a \$1,000 annual salary to 125,000 teachers and 125,000 nurses."

With the question so posed, it would seem to us certain that the nations of 1900 would have been willing to sacrifice even cherished national aims for the benefits of peace. But would they? With thousands of maimed men yet living and fleets of merchant vessels rusting in harbors to remind us of the cost of the last war, we of 1931 persist in desiring to sacrifice even cherished national aims that can but lead to conflict. Realistic newspaper correspondents each morning scan dispatches, ready to hasten to the cradle of "the next war"—a war that admittedly will bankrupt civilization.

It can, of course, be avoided at a price. The price is that nations learn how to live and to let live, even though it involves relinquishing of what in an early day of relations between individuals was called "rights". Men of goodwill will continue to believe that some day governments having weighed the case, will elect to do this.

Finds Them Expressive

Many American Slang Terms Found In Oxford Dictionary

However rude or crude are American terms, they are so expressive and impudently near the truth that it is very hard to resist giving them a place in any honest lexicon. Such terms are "graft," "once-over," "foolproof" and "step on the gas." This was the explanation given by President George Gordon of Magdalen College, Oxford, England, for their inclusion in the new supplementary volume of the Oxford Dictionary. Among other phrases which have been introduced into the English language in the last 50 years and given a place in the dictionary are "all of a day's do," and "give it the once over."

Rudeness may be propagated from word but as the identity of the variety is likely to be lost through cross-breeding in the fertilization of the seed it is better to propagate by transplanting sections of the root.

W. N. U. 2647

Points In Rose Planting

Necessary To Make Sure That Roots Have Not Become Too Dry

When new rose plants are received, it is important that the roots should not be allowed to dry out under any circumstance. It is a good practice when opening the parcel of rose plants to plunge the roots into water and leave them there for several hours, or to bury the plant, root and branch, in moist soil for a few days. Either of these practices will restore the moisture in the stems that has been lost during the winter season.

Hybrid tea roses should be planted about 18 inches apart; hybrid perpetuals, two and a half to three feet; and the rugosa hybrids, the moss roses, and other large-growing hardy sorts about four feet apart. It is necessary to prune back severely and the bushes should be planted deep enough so that the point of the union between stock and scion is from two to three inches below the surface of the ground. This is important, because, if the union is at or very near the surface, the sun shining on it hardens the wood and prevents a free circulation of sap, which is not desirable as a strong vigorous growth is necessary for best results. Roses need an abundance of moisture and the surface of the soil should be kept loose from spring until midsummer. After each rain the rose bed should be hoed or raked, leaving a rather loose surface, or during a dry time, if it is necessary to water the roses, the soil should be loosened after watering. It is better to water roses thoroughly occasionally, than to give them a light watering frequently.

The First Coal Mines

Pits Were Shallow And Coal Was Obtained By Tunneling

Coal was first dug in the British Isles on the south shore of the Firth of Forth. For centuries there were no means of draining coal pits, and early coal was obtained in hilly districts, where it could be reached by tunneling. In some places shallow "bell pits" were dug. In 1719 the deepest coal mine in the country was only 300 feet deep. Gunpowder was first used to blast coal in that year. In pits where fire-damp accumulated, it was exploded each morning by "a resolute man of purpose," who went down clothed in rags saturated with water and provided with a long pole at the end of which was a lighted candle. There was no form of safety lamp until the year 1815.

By Ruth Rogers

AN ADORABLE NEW CAPED SLEEVE DRESS

And a likeable model from every point of view.

You'll adore this delightful little model with all its new, young and modish features.

It has the cape sleeves so a la mode, sun back and wrapped skirt which allows plenty of freedom for motion. Lovely schemes in cottons, linen and tub silks can be worked out most attractively in this model. The sleeves can be of self-material, if you prefer.

Style No. 665 is designed for sizes 11, 13, 15, 17 and 19 years. Size 15 requires 2 1/2 yards of 39-inch material with 1 yard 39-inch contrasting.

Price of pattern 20 cents in stamps or cash (coin is preferred). Wrap coin carefully.

Acted As Boomerang

Hit by its own torpedo, fired in naval manoeuvres at Hots Bay, Sweden, a vessel was considerably damaged. The torpedo was deflected and completing a circle, struck the ship from which it was fired.

Canada And United States Relationships To Be Studied By The Carnegie Endowment

Holland Destroying Cattle

Hopes To Put Dairy Industry On Paying Basis

The mania to force prosperity by wholesale destruction of valuable property is extending to Europe. A plan has been authorized by the government of Holland whereby two hundred thousand head of valuable dairy cattle will be slaughtered in an effort to put the dairy industry on a paying basis.

A central body has been organized with government authorization and it is empowered to impose a levy on all cattle slaughtered in Holland. The returns from this go into a central fund and this fund is again used to purchase cattle for slaughter, the meat and by-products being disposed of on behalf of the central organization. It is said that the number of cattle in Holland in 1933 was 1,452,331.

Some economists profess to see in the destructive methods that are applied to industry throughout the world the possibilities of an eventual renaissance. It is certain that these methods are contrary to all the principles of thrift which have been taught in the past.

What Interested Him

Frenchman Not Admiring Young Lady As She Thought

A fair creature who returned recently from Paris has told us of a grand passion she encountered in the Cafe de Paris, where she lunched alone one day. A handsome Frenchman at a nearby table kept glancing at her with she opened a stack of mail she had just received from America, the glances apparently becoming progressively warmer as she proceeded. When she was about to leave, having paid her check, and got out of his life forever, it was too much for the boulevardier. He approached her, bowed, and said: "Madame, will you be so gracious as to permit me to remove the stamps from your letters?" The New Yorker.

Has Overcome Obstacles

Hats off to Eleanor Gertrude Brown of New York who in spite of being blind from birth and burdened by poverty and sickness, will graduate from Columbia University with the degree of Doctor of Philosophy. When some of us think we are having a hard time think of Miss Brown, who has made stepping stones of what most of us would count insurmountable obstacles.

An attack on the problem of international peace through a broad study of 150 years of peaceful relations between Canada and the United States was announced by the Carnegie Endowment for International Peace.

Dr. James T. Shotwell, director of the endowment's division of economics and history, revealed details of a vast plan for surveying economic, social and political contacts between the neighboring nations.

While the project has been under way for two years, it had not even previously made public. The survey involves two more years' intensive research with large staffs working both in the United States and Canada.

At the same time, Dr. Shotwell said his division has completed its 150-volume history of the Great War, except for two volumes to be published in the autumn.

The study will cover the relations of the two countries from the time they were fur traders and forest rangers down to the present. The endowment expects the survey to produce a vast amount of valuable data.

Dr. Nicholas Murray Butler, president of the endowment, will head a central international committee to plan the character and scope of the survey.

Sir Robert Borden, Rt. Hon. Arthur Meighen, Senator Rudolph Lemieux, Sir Robert Falconer, Dr. G. W. Collyer, Senator W. Rowell, K.C., Vincent Massey, Edward W. Beatty, K.C., Thomas R. Russell, John W. Duffe and Dr. R. C. Wallace are the Canadian members.

Technical committees for each of the major problems will conduct the actual survey. Distinguished economists, engineers, historians and other professional men on each side of the border will participate.

Ten to 15 volumes dealing with subjects of outstanding interest are expected to be published within the next two years.

Make Good Messengers

Scotland's Girvan Pigeons Are To Be Depended On

Scotland's wonder birds, Girvan pigeons, are superior to the radio for transmitting messages from the lighthouse keeper at Ailsa Craig to the mainland, according to Archibald S. Girvan, bossman of the Northern Lighthouse Commissioners, who takes the birds every Tuesday to Ailsa Craig. When the keeper wishes to get in touch with Girvan he releases one of the birds. It immediately makes for home carrying a message in an aluminum container. Under favorable conditions it flies 100 miles in 15 minutes, but it is sure to arrive no matter how severe the weather. "I believe there is no service quite like this one in the world," says Girvan.

Artificial Rain

Experiments Being Carried Out In Russian Areas

Artificial rain was produced in the neighborhood of Achikhabad in Russia by scientists who have been experimenting to obtain this effect.

With the aid of chemical compounds they produced a fog on a sunny morning and as the wind carried this across the fields it deposited drops of dew on the soil. The same method will draw rain from a cloud, the scientists state.

These results are of great significance for in the great stretches of Turkestan and other areas in the 17,882,000 square miles which rain and snow fall over this area usually total but 100, leaving more than two-thirds of the year dry.

Like Ocean Travellers

We are like men and women who pace the decks of ships at sea, we seem to come back again and again to the place of our departure, but while we have been moving we have come into new latitudes and longitudes and the constellations themselves have altered their relationship to the journey on which we started. All this is part of the deep meaning of life.

MARY PICKFORD RETURNS TO THE CITY OF HER BIRTH

The famous screen star, Mary Pickford, went home to Toronto, the city of her birth, recently, and was accorded a tumultuous welcome. It was her first visit in many years and was made at the special request of Toronto, which is this year celebrating the centenary of its incorporation as a city. Above us, Miss Pickford, as she responded to the various tributes tendered her at the civic luncheon in her honor, while at the right is a view of one section of the enormous throng that crowded the City Hall to participate in the civic welcome given there to the popular star.

Alberta News Items.

Issued by the Publicity Commissioner, Government of Alberta, Edmonton, June 16, 1934

Highway Improvement

First of the season's contracts for graveling of highways will be awarded June 20, following financial arrangements completed between the federal and provincial governments for road work. The first series of contracts will include the graveling of the balance of No. 3 highway from Box Island east to the border of the province; the graveling of a stretch of the Jasper Park highway from Evansburg to Galloway, 18 miles, which work will put the Jasper highway in comparatively good condition; as well as further graveling from Calgary to Okotoks, the Alberta bench highway west of Edmonton, High River to Vulcan, Lethbridge to Taber, Stirling, New Dayton, and Spring Coulee-Lethbridge, Castor-Coronation, Lacombe-Gull Lake and Wetaskiwin-Pigeon Lake.

Numbers on Relief

Throughout the entire province of Alberta, 55,282 persons were listed as recipients of relief as at June 1st this year compared to a total of 52,851 men, women and children shown on the relief lists as at the same time in 1933. This is an increase of 2,431. The 1934 total when split up shows 26,702 on relief in the cities, 26,500 in the rural municipalities and outlying districts, and 1,880 single men cared for in relief kitchens and camps.

Municipal Road Grants

Allocations of government grants to municipalities and improvement districts throughout the province, for road work purposes, have been made. It is stated by Hon. O. L. McPherson, minister of public works, and each district is being notified of the amount available for its season's requirements. This is the first issue of grants to municipalities for the year, no such grants having been paid in 1932 or 1933. The total appropriation this year, as voted by the legislature, was \$2,910,000, which has been allocated on a basis of population, mileage of roads and construction costs.

Fires in Alberta

Thirty deaths from fires was the casualty list for Alberta in 1933, according to the report of Fire Commissioner Henry Biscoe, compared with only nine last year. There were 1,823 fires during the year in all parts of the province, and property loss aggregated \$1,436,612, as compared with \$2,495,804 from 1,937 fires in 1932, a reduction in losses for the second year in succession. The 1933 loss was the lowest fire damage on record for the past 14 years. While the number of fires was only slightly less than before, the report points out that the fires that did occur did not assume the proportions or cause the destruction that was the case in former years. Eight out of every ten fires are declared to have been due to carelessness in the handling of fires, or neglect in removing fire hazards.

Correspondence.

The Editor, Didsbury Pioneer

Dear Sir:—

"An thou can't not smile as the wind sits, thou'll catch cold shortly." Surely Shakespeare had school teachers in mind when he wrote these words.

Since I am leaving your district I dare to say what I am confident ninety-five per cent of the ratepayers of this district are saying, "There has been a great injustice done."

The principal of your High School has worked faithfully and well. His pupils have passed with high averages—averages far above those of most of the schools in the province. He has had real discipline in his classrooms—not the discipline that comes with punishment and nagging, but natural discipline, for he has taken the trouble to become acquainted with your boys and girls, to know them as individuals. Will you consider for one moment, please, the fact that in three years' time it has not been necessary to expel one pupil from this school; that in three years' time not one pupil has committed a really serious breach of discipline. Do you, mothers and fathers, think that this is a matter to be passed over lightly?

Then, a principal is more than a teacher. He must have an understanding of human nature, and he must have the ability to dominate his staff of teachers and yet to get along with them without friction. Three years ago you rejoiced because you had a staff of teachers who worked in perfect agreement. I, as a teacher, give the credit for that agreement to where it belongs—to the principal.

This letter intends no reflection on whoever may have been chosen for this position. It is merely a plea that justice may be done to the present principal. No reason was given for his dismissal, and no reason can be given, unless you—

"Get thee glass eyes; And, like a scurvy politician, seem To see things thou dost not."

And, if there had been a reason, surely those who believe in the golden rule would have given him a chance to resign.—But, not!—The most a teacher can expect is a moment's notice and a curt "Your services are no longer required."

—Irene Grant.

WARNING.

The picketing or pasturing of cows or other animals on any street or lane within the Town is prohibited. Citizens are warned that such animals are liable to be impounded.

Alberta Crop Report.

Issued by Alberta Department of
Agriculture, Edmonton,
June 16, 1934.

The entire agricultural outlook in
Alberta has undergone a rather
striking reversal since the last re-
port of the department issued a
fortnight ago, as a result of the
rains which have been general
throughout most of the province
since June 1st. The last report in-
dicated very clearly that a serious
situation existed in many of the
southern districts as a result of the
prolonged hot, dry weather, and
that only immediate and substan-
tial precipitation could save some of
these districts from a disastrous
crop failure. The precipitation
came just in time to effect recovery,
and the rains have not only substan-
tially restored grain crops in
many districts, but have greatly
improved the range and pastures,
as well as increased the possibilities
for a satisfactory production of feed
crops. In the very dry areas where
cattle were suffering and the farmers
had begun to despair of crops, con-
fidence has been restored to a large
extent, and while some of the areas
in the south still need further rains
to carry the crops along, there has
been a gratifying improvement.
Crop prospects throughout the
province may now be described as fair
to good in the southern areas, and
very favorable in the central and
northern areas. The weather at
present writing is cool and showery
over most of the province.

Some re-seeding has been done in
a few areas where drought condi-
tions and soil drifting had seriously
affected early crops, and coarse
straws have in some of these in-
stances taken the place of wheat.
Winter wheat and rye crops have
also suffered from the early drought.

Grasshoppers, wireworms and
cutworms have been active and have
done some damage in a few districts
in the south, especially to late-grow-
ing crop. The grasshopper poison-
ing campaign is in full operation,
the rains not having checked the
activity of the hoppers to any great
extent.

The wheat crop growth, particu-
larly in the central areas, has been
rapid and is further advanced at
this date than has been usual.
Much of the wheat is now in the
boot blade. In the south winter
wheat is beginning to head. First
cutting of alfalfa will be proceeding
next week. Prospects for the hay
crop are much improved, but the
crop will still be short in some dis-
tricts. Live stock is generally in
good shape and in the dry areas
cattle are responding to better pas-
ture conditions.

"Tugboat Annie."

This weekend the Opera House
picture fans are to see Marie Dressler
and Wallace Berry in "Tugboat
Annie." This is their first appear-
ance together since "Min and Bill,"
and it is a real treat. It is sometimes
hilariously funny, sometimes tenderly
dramatic, but always entertaining.

The public has long clamored for
another Dressler-Berry picture, and
the present story has provided an
ideal one. There are hilarious quar-
rels between the redoubtable feminine
tugboat captain and her shiftless,
good-natured husband; mother-love
furnishes a poignant heart interest,
and there is a tremendous dramatic
climax in the amazing episode in
the engine-room.

Miss Dressler plays Annie, with
Berry as her husband, Teary, and
Robert Young as Alee the son, who
grows up, becomes captain of a liner,
marries the daughter of a shipping
magnate and seeks to remove his
parents from the tug which is their
livelihood and home. The father
lapses into his old alcoholic habits
and the son disowns him, but when,
in rescuing the son's liner the father
makes an astounding sacrifice, their
difficulties are smoothed out. Berry's
scene, plunging leaking boiler tubes
in a flaming firebox at sea, is the
highlight of a delightful romance.

Berry and Miss Dressler, of course,
battle, make up and share countless
laughs. Frankie Darro is clever as
the son before he grows up, and
Maureen O'Sullivan makes a beau-
tiful sweetheart for the young captain.

You'll enjoy every minute of the
show this Saturday evening at the
Opera House.

Didsbury Farmers Visit Packing Plant

About 30 farmers of the district
accepted the invitation of the
Mountain View Livestock Associa-
tion to visit the Burns Packing Plant
on Thursday last when a very inter-
esting and instructive day was spent.

In the morning they visited the
yards and witnessed the cutting out
and grading of a car load of hogs,
afterward going to the cattle yards
and checking up on the cattle.

After being entertained to dinner
they were taken through the pack-
ing plant and the different processes
were explained.

Mr. A. Kershaw was successful in
winning the prize of two sacks of
tankage for making the nearest
estimate on the weight of a beef
cass, coming within one pound
of the actual weight.

Tractor Races at Western Fairs

Visitors to the western fairs and
exhibitions next month will have
the unique experience of seeing farm
tractors streak around the race track
at mile-a-minute speeds. One of
these tractors, the famous Allis-
Chalmers No. 999, which holds the
world's speed record for tractors,
will be driven by Louis Meyer, the
famous racing driver, who will use
the new low-pressure Firestone farm
tractor tires. Meyer is the only man
who has ever won three A.A.A.
championships and is one of the pair
who have twice won the Indianapolis
speedway race.

Since their introduction several
years ago, pneumatic tires for trac-
tors have met with great success.
All equipment manufacturers have
adopted them, and tests show that
tractors with these tires are able to do
27 per cent. more work, with 24
per cent. savings in fuel, while the
tractor life is extended 33 per cent.,
and repairs reduced by 60 per cent.

1934 Fruit Season Early.

As the season is so early in B.C.
the fruit growers and their neighbors
here, when writing to their friends
on the prairies, should advise them
to procure their fruit early.

Strawberries started last year near
the date which finds them this year
drawing to their close. Cherries
will be running fully next week,
and raspberries, Logans and black-
currants will be ready this month,
although the home-canning of these
in most seasons does not start till
July. The later fruits are likely to
be proportionately early.

NOTICE

Notice is hereby given under Section 48
of the Domestic Animals Act (Municipalities)
that One Bay Mare about 3 years old,
bold face, two hind feet white, branded
right thigh, was impounded in the
pound kept by W. J. Schell, and
located on the N.W. 16-M-1-5 on the
18th day of May A.D. 1934, and that said
animal was sold on the 31st day of May
A.D. 1934 to John Ragner of Didsbury.

Said animal may be redeemed by the
owner or on his behalf within a period of
thirty days from the publication of this
notice in The Alberta Gazette, upon pay-
ment of all fees and costs due to the
municipality and the purchaser of said
animal.

For further information apply to the
undersigned.

WORLD HAPPENINGS BRIEFLY TOLD

Nathan F. Groppe, Saskatoon, won the prize for the highest standing in second year dentistry at McGill University, it was announced.

Leon Trotsky has shaved off his famous beard and moustache to conceal his identity as he wanders about Europe seeking a new refuge. It was reported.

Winnipeg health authorities were seeking to stamp out a widespread but mild epidemic of measles. Altogether between Jan. 1 and May 12 a total of 4,095 cases had been reported.

The House of Lords approved in third reading the bill forbidding visas. The measure, which had already passed through the commons, was designed to protect animals from unnecessary suffering.

Japan's first official move in the trade deadlock with the United Kingdom was an effort to induce the London government to modify the restrictions recently placed on imports from Japan.

Dr. Stewart Rieburn Kirk, assistant professor of geology at the University of Manitoba, died at Winnipeg after a protracted illness. He was 35 years old and was a native of St. Andrews, Scotland.

The United States department of commerce issued statistics showing the value of foreign liquors held in bond warehouses to have increased from \$15,000,000 Dec. 31 to almost \$16,000,000 at the end of March.

If Canadian and United States wheat crops are reduced by one-third by the recent dust storms, it will be a "godsend," said Hon. Earl Brown, former assistant secretary of agriculture in the Wilson cabinet of the United States, in an interview at Toronto.

Citing the rapid decline in the number of cases of tuberculosis in Saskatchewan, Dr. R. S. Ferguson, superintendent of Saskatchewan sanatoria, expressed the opinion that within the next few years the disease will practically have vanished from the province.

Donald Cameron McGavin, third year arts student at Union College, is winner of the governor-general's gold medal for general proficiency in the faculty of arts and science at the University of Manitoba. He is the son of Dr. and Mrs. A. McGavin, Carleton Place, Ont.

Destroying More Coffee

Arnaldo Viali, president of the Brazilian National Coffee Department, estimated that Brazil's coffee crop for 1934-35 would be 8,000,000 bags, while the carry-over would be 2,000,000 bags. The amount of coffee destroyed to date has been 27,156,000 bags. It is planned to destroy 5,570,000 bags more on June 30.

The datura should not be planted until all danger from frost is over.

FRETFUL BABIES Quietly!

"If my three baby boys were restless with colic or gas from their teeth I give them a Baby's Own Tablet and they were soon asleep," says Mrs. J. J. Ford, 472 Mill, Wood Hill, Toronto. "I have several little babies and the effect of Baby's Own Tablets on the colic and the sleeplessness of babies is wonderful. I have used them on all my babies and they are now sound asleep and healthy." Price 25¢ at your druggist.

Agricultural Notes

Many Items Of Interest To The Western Farmer

There are 680 genera of good plants occurring within the Dominion of Canada.

The only broad-leaved evergreen tree in Canada is the Madroña. It is a small tree with thick leathery leaves and is found in the coast region of British Columbia.

The sales of brandied beef in Canada for the first three months of 1934 totalled 8,069,450 lbs., an increase of 1,146,250 lbs. on the corresponding period of last year.

The disagreeable odour of the Canadian skunk cabbage is believed to be for the purpose of attracting carrion flies and thus securing pollination.

For the first three months of 1934, hogs gained in Canada showed an increase of 17,762 head over the corresponding three months of last year, namely, 835,358 in 1934; 817,566 in 1933.

Plantings of potatoes in Canada in 1932 increased one per cent, namely, 127,700 acres as compared with 127,500 acres in 1932, while the average yield was 78 cwt. per acre as against 76 cwt. per acre in the previous year.

The Canadian potato crop for 1933, according to the Markets Extension Division of the Dominion Department of Agriculture, is estimated by the Bureau of Statistics at 41,296,000 cwt., an increase of 5 per cent over the 1932 production of 39,416,000 cwt.

The problems confronting the cheese industry in Quebec are quite similar to those in Ontario. In both provinces, declining volume of output has had a tendency to raise production costs per unit of product manufactured. The Economic Annalist.

The minimum temperature reached in winter in Canada is of great importance in determining the distribution of plants, more particularly in the case of shrubs and trees. Hibernaceous plants are often protected from the effects of severe cold by a covering of snow. Dominion Department of Agriculture.

In the shipments of livestock from Western to Eastern Canada during the first three months of 1934, cattle, calves, and sheep showed an increase, and hogs a decrease, compared with the corresponding period of last year. Figures for the latter being within brackets—cattle, 21,188 (7,642); calves, 348 (19); sheep, 31,210 (26,140); and hogs 68,567 (93,366).

The inclusion of rough unsuitable types in the majority of the cattle shipments to the United Kingdom in 1933, especially during the season when grass-fed cattle were loaded, was disappointing, writes the Canadian animal products trade commissioner in Great Britain, and it is indicative of the reputation of Canadian cattle as a whole. Only the right kind of cattle should be loaded for export.

The European apple sucker was first discovered in Canada at Wolfville, N.S. in 1919, and since that time has spread generally throughout Western Nova Scotia, as well as to the eastern section of New Brunswick and Prince Edward Island. To prevent further extension of this pest, a quarantine has been maintained on the known infested counties. This means that fruit growers in New Brunswick located outside of the counties of Westmorland, Albert, Kings, and St. John, may not procure any of the host plants from these counties, or from the provinces of Nova Scotia and Prince Edward Island.

Bordeaux Dust

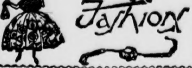

In combating flea beetles, or in treating potatoes for insect enemies, a Bordeaux dust may be used in place of the regular poisoned Bordeaux spray. Such dusts can be purchased from all commercial spray companies ready mixed, or they may be prepared on the premises, provided a good mixing machine is available. The following is the standard formula for Bordeaux dust: Copper sulphate (dehydrated), and ground vermiculite, 12 pounds; hydrated lime, 8 pounds; arsenate of lime, 8 pounds.—Vegetable Insects Bulletin, Dominion Department of Agriculture.

FALSE TEETH

Dr. WERNER'S POWDER

Would you like false teeth to fit so firmly yet comfortably they feel natural—eat, about, laugh, all day long you can forget about them. Simply sprinkle on Dr. Werner's Powder—presented by the world's foremost dentists—the one powder that assures 100% secure comfort. SPECIAL FEAT: REMOVES comfort-cushion protects sensitive gums—always keeps mouth clean and healthy. Inexpensive—any drugist.

Little Journeys In Science

VITAMINS

(By Gordon H. Gould, M.A.)

Among the notable discoveries made by scientists in recent years, is that of vitamins. While they are as yet not known to have shape, taste, weight or color, they have been found to be a very necessary part of the diet, and to prevent many forms of disease. They were first discovered to exist in certain foods by medical men who were experimenting with the effect of diet on health. At about the same time, food chemists came upon these mysterious characteristics which could not be classified with fats, carbohydrates, proteins or mineral matter, the known components of food, yet which seemed to have definite life-giving qualities. Work is being constantly done by scientists in many lands in an effort to find out exactly what vitamins are, but so far they have only been able to classify them according to what characteristics can be observed. As far as is known, vitamins contribute no material sustenance or energy to the body, but they act as what chemists call a catalyst, that is, they speed up the life processes. Vitamins have been designated by letters in the alphabet.

Vitamin A is found in green vegetables, cod-liver oil and liver, and is growth-promoting. It was once thought it prevented a dread eye disease, but this theory is no longer held.

Vitamin B is found in vegetables, milk, whole fruit, Graham flour and yellow corn meal. It is one of the most important members of the vitamin family, for it prevents beriberi, a dread disease contracted by people who live on polished rice.

Vitamin C occurs in fruit and to a small extent in milk. This vitamin prevents scurvy, a disease which formerly took many lives.

Vitamin D occurs in cod-liver oil and it prevents rickets in infants.

Vitamin E is found in meat, the germ of the wheat seed and in numerous other natural foods.

Vitamin G, only recently discovered, is found in some types of yeast and has growth-promoting qualities.

Tribe Faces Extinction

White Indians Of Brazil Have Only Few Survivors

Extinction is drawing near for the Witoto Indians, the once-powerful race of "white" Indians who populated British Guiana's unexplored hinterland in thousands at one time. Back in the colony's wild southern border, the numbers of the tribe have been slowly declining until now there are but a few survivors.

The discovery was made by a survey party, now demarcating the boundary line between British Guiana and Brazil for the British Guiana government. Members of the party, pushing their way through dense jungle growth in a strange territory, came upon the tribe's remnants a few miles from the Brazil border.

The handful of startled natives, grouped in a few huts, consisted chiefly of old men and women. Death was not more than a few years away for most of them, and to the explorers it appeared but a matter of time before the tribe would be extinct.

Their complexion was described in reports reaching Georgetown as of a pale pink color. The white visitors found another characteristic of their own race among the Indians, they whistled while they worked.

This same characteristic was noted by the late Dr. W. E. Roth, who discovered the race in 1925 while the noted anthropologist was carrying out ethnological observations for the United States government and the Smithsonian Institute. Dr. Roth said it was the first time he had come across Indians who whistled.

At the time of his visit, the tribe numbered 150. But from neighboring peoples it was learned the "white" Indians once populated a wide territory in British Guiana's interior. The reason for their gradual extinction was never learned.

The total annual production of clover and grass seeds in Canada has remained about the same in recent years.

If Past 45 and "Low" and Upset Look for Acid Stomach

HERE ARE THE SIGNS:

Nervousness • Frequent Headaches
Neuralgia • Feeling of Weakness
Indigestion • Sleeplessness
Loss of Appetite • Bloating
Nausea • Sour Stomach
Auto-intoxication

WHAT TO DO FOR IT:

TAKE—2 teaspoonfuls of Phillips' Milk of Magnesia in a glass of water every morning when you get up. Take another teaspoonful 30 minutes after eating. And another before you go to bed. OR—Take the new "acid" Milk of Magnesia Tablets—our latest for relief above.

If you have Acid Stomach, don't worry about it. Follow the simple directions given above. The simple dosage of Phillips' Milk of Magnesia acts at once to neutralize the acids which cause headache, stomach pain and other distress. Try it. You'll feel like a new person.

But—be careful you get genuine Phillips' Milk of Magnesia. Phillips' Milk of Magnesia Tablets when you buy—25¢ and 50¢ sizes.

ALSO IN TABLET FORM

Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

MADE IN CANADA

Phillips' Milk of Magnesia

Flight From London To Melbourne

Wiley Post Intends To Fly The

Winnie Mae In Race This Fall

Wiley Post has announced that he is getting the Winnie Mae, the monoplane in which he circled the globe, into shape for a "two-day" flight from London to Melbourne, Australia.

The present record over that course is approximately one week. He will enter, he said, the MacRobertson international air race to be held next fall between the British and Australian cities.

MacRobertson has offered \$61,800 to the winner.

SOURD ON THE WORLD?—THAT'S LIVER

Wake up your Liver Bile

—No Calomel necessary

Many people who feel sour, sluggish and weary wake up the morning with aching joints, oil, indigestion, water, indigestion, and the bowels and ignore the liver.

What you need is to wake up your liver bile. That's your liver's power. The daily dose of liquid bile lets your liver do its job. Your stomach and intestine working as they should mean more.

Get a Little Liver Bile with you for a dose of bile. It's the only one. Ask for it in your store. Before bedtime, 20¢ at a druggist.

Hedges will thrive best if the soil is kept cultivated and free of weeds to a width of two feet or more on each side of it. An occasional top-dressing of fertilizer may prove beneficial, particularly on light soil.

"I like to see something that has plenty of funny lines," says a dramatic critic. Then why doesn't he buy a zebra?

AFTER ACCIDENT SHE PUT ON WEIGHT

Kruschen Took It Off Again

A woman sends the following account of the consequences of an auto accident in which she was involved:

"A year ago I had a very bad automobile accident, which left me more or less a cripple. Having to lie in bed so long, and being unable to move, I began to put on flesh. When I was able to walk a little again, I found I was 144 lbs. and being just under 5 feet you may guess how I was placed. So I thought I would try Kruschen Salts, and I must say they have done me a lot of good in every way, but chiefly in keeping my weight down. In three months I lost 6 lbs. Then I left on taking the Kruschen, and I soon went up to 142 lbs. again. So at once I got more Kruschen, and am again steadily reducing. My weight last month was 134 lbs." (Mrs. W. H. M.)

Kruschen combats the cause of fat by assisting the internal organs to perform their functions properly, to throw off each day those waste products and poisons which, if allowed to accumulate, will be converted by the body's chemistry into fatty tissue.

OCCASIONAL WIFE

By EDNA ROBB WEBSTER
Author of "Jorjett," "Lipstick Girl," etc.

SYNOPSIS

Camilla, Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad, and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age, and so is studying commercial art in the hope of landing an agency job. Others in the story are Aylee News and another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. After a party at an exclusive club, when the rest of the members of the party go to a cabaret to continue the party, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Aylee and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio, Aylee Werth calls and persuades Peter to accept a loan of \$10,000. Peter and Camilla are reconciled. Aylee invites them to a party, at which she introduces Peter to well-known artists and public men.

(Now Go On With The Story)

CHAPTER XLIV

"A title is always very important," Aylee observed, and turned to Camilla. "Don't you think so? It has so much to do with the success of a book or play or picture. And it does with a piece of sculpture. And it should strike the public's imagination, as well as being appropriate to the subject."

"Of course," Camilla agreed. She reflected that she probably knew more about that than Aylee did. Wasn't that her obligation in her work to attract the public eye with a few well-chosen words? "Have you anything in mind?"

"Several," Peter nodded, "but I've been so busy getting the unnamed thing finished that I haven't given it much thought. No use to have a

name, however alluring, without an object to go with it."

"I had an idea the minute I saw it," Aylee explained. "Just the one word, 'Inspiration' seems to me to fit it exactly. What do you think of it?"

Camilla repeated the word thoughtfully. "It sounds rather well," she hesitated.

Aylee recoiled instantly. Her displeasure over Camilla's semi-enthusiasm was almost visible. She turned to Peter confidently. "Don't you like it better, the more you hear it? Doesn't it sort of grow on you?"

"I believe it does," he admitted, then turned to Camilla. "Have you a suggestion, dear? The committee is open to my new idea, and anxious for one."

"I've thought a lot about it," she confessed, smiling. "I have a list of ideas written down at home, but the best one I have thought of is 'Eager Youth'."

Silence for a moment, dominated by Tillie's clashing of china and silver in the kitchenette. "Yes, that's hot, all right," Peter exclaimed. "Well, you sly little cricket—had a whole page of titles topped by a prize winner and you haven't said a word!" He was immensely pleased.

"I was waiting for you to tell me your own ideas first, so you wouldn't be influenced by mine," Camilla explained quietly. "I wanted the whole thing to be yours, title and all, unless you got stuck and I could help you out."

"Gosh," he enthused, "Am I in luck to have two women working their clever brains to name my stuff. It ought to be good!" He turned to Aylee. "What do you think of that?"

"Very good," she agreed instantly, but she thought to herself, "I'll handle you, alone."

"Anyway," Peter decided, "we have another week to think it over. It won't take long to scratch the title on when it's finished. Both of you keep up the good work and we'll vote on the final selection."

Camilla remained with Peter for what was left of the night, but it was only four hours later that she resolutely left him to his work and returned to her own apartment for a busy day of routine tasks, preparing her clothes for the following week and an afternoon nap that refreshed her for the evening, when Peter came to take her to a movie.

It was entertainment which permitted them to relax as that of the previous evening had not done, and although they were in a crowded theatre, they might have been entirely alone for the two hours in which they sat close together in the darkness and watched the tragedy of human emotions on the screen evolve into the miracle of happiness. There even emotions had been tense in the crisis of those make-believe lives, and it was with relief that they witnessed the final dissolution of all strife and misunderstanding.

"They always live happy ever after," Peter laughed.

"They should, after all that effort to deserve happiness. Not all stories end happily, but I like them a lot better when they do don't you?"

"I guess everyone does. Still, you remember the tragedies longer. I guess that is why a few authors dare to leave them that way. True to life, too. There are plenty of real tragedies in real life that never end in happiness."

"Yes, and the saddest ones are those we never know about. Sudden death, murder, failure, are not the real tragedies. The worst ones are lived behind smiles and service, in silence. But we are going to have a happy ending," she added cheerfully and confidently.

"You know it," he affirmed quickly. "At least, we are going to give the controllers of destiny a fair struggle."

"Just imagine, Peter, you may be in Paris in less than two months," she reminded him wistfully.

"I doubt it. If I'm not, I'll be earning some real money, though."

Always, the human mind is forced to measure achievement in financial terms, because the world ruthlessly demands that "with the same measure that ye mete withal, it shall be measured to you again." Each man measures his neighbor's success by that standard, by which the world judges him in return. It is no more fair than the scale of civic justice, but it is irrevocable. Effort and tal-

ent are cast into the discard for the glittering display of possession.

Camilla experienced her first moment of tangible achievement when she arrived at the office on Monday morning and Margaret Blaine greeted her with:

"Have you seen the new issue of Weekly Review? Your Tiny Tots scampier at over the centre double-scampier all over the centre double. A strange evolution goes up in Camilla's breast and she seemed to soar in the air like a flying bird. Her shining eyes just looked at the droll little figures. She could not speak."

"Well, aren't you thrilled to death to see them for the first time in actual paint?" demanded Margaret. She was secretary to Mr. Weeks and held a profound respect for creative talent.

"Of course, I am," Camilla confessed. "But what shall I do about it?"

"Say, if that was my stuff, I'd make whoopee like an Indian—well, I don't know what I would do."

"That's just about the way I feel. That is why I don't do anything at all. They do look darling, don't they?" she added fondly, quite as if anyone else had created them and she was admiring them.

"Do they? If that ad doesn't make the kids notice and demand Wheat-hearts, nothing will."

"I hope you are right," Camilla said quietly. Again, that standard of success confronted her. Her work would be praised or condemned according to the measure of its return measure in gold to her employers.

Margaret's opinion did not make it good, nor the opinion of any critic. But if that, hectic composite mind that is known as public opinion, chose to favor her work with its passing approval, her work would then turn to gold for her employers and in turn, gold for her and her work would be good!

Camilla telephoned to Peter during her lunch hour. "Have you seen the new Weekly Review?" her voice sang with exuberance.

"No, I haven't."

"Well, rush out and get a copy and feast your eyes on that middle spread, by your very own wife."

"Will I! Congratulations, darling! I'm terribly proud of you. When do we celebrate?"

"When you finish the figure. Then it will be a double celebration for the famous Ansons."

"How famous?" he laughed.

"Just among ourselves, for awhile."

"Okay, honey. I won't lose a minute getting that magazine, you can bet. I'll call you back later, and tell you what I think of this new Anson artist."

Camilla accomplished little work that day. Every employee and executive had to compliment and commend upon the initiation of the Tiny Tots into the world of affairs at large and advertising in particular. Each was optimistic regarding their popularity, and Camilla walked again on winged feet with her head in the clouds of hope.

Her elation was not oblivious. If possible, she was more quiet and reserved than usual. For deep emotion is not expressed in sounds and actions. It is lived within the heart and soul. Only superficial emotion manifests itself in violent demonstration.

(To Be Continued)

A new bait for grasshoppers is being tried out by the U.S. Department of Agriculture, of being substituted for molasses in mixing the bran and arsenic. Oil baits, it is stated, do not deteriorate during storage as rapidly as molasses. In Canada, water-mixed bait has been found to be the most attractive to the insects, because grasshoppers like to drink when they eat.

Great Salt Lake in Utah is more than four times as large as the Dead Sea.

END PAIN—Soothe SORE HANDS
by Rubbing in
MINARD'S
"KING OF PAIN"
LINIMENT

Quick Relief Now From Neuralgia

Real ASPIRIN Starts Taking Hold in Few Minutes

Now comes amazingly quick relief from headaches, rheumatism, neuritis, neuralgia... the fastest safe relief, it is said, yet discovered.

These results are due to a scientific discovery by which an Aspirin Tablet dissolves, or disintegrates, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain a few minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly you swallow it. And this is truly so in each almost instantly.

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN's quick relief, be sure the name Bayer in the form of a cross is on every tablet of Aspirin.

Does Not Harm the Heart

Cunard Sailings

Initial Trans-Atlantic Trips Marked By Heavy Passenger Lists

The St. Lawrence season of the Cunard and Anchor-Donaldson Lines opened recently with the arrivals and departures of the Ansonia and the Athenia. The Ansonia made her first appearance early in May and from now on, these companies will maintain practically a weekly service to Plymouth, Havre and London and to Belfast, Glasgow, and Liverpool, throughout the summer and autumn, until the close of the St. Lawrence. Liners on this route will, beside those mentioned, include, The Letitia, Alouina, Ascania and Aurania.

The initial departures have been marked by heavy passenger lists. All classes and with the advance reservations already made up, summer sailings, would indicate that this will be a good year for trans-Atlantic business.

Slight increases in exchange rates in certain European countries have been more than offset by falling prices abroad; the many lands, hotels and railways have reduced their tariffs by as much as half.

Indications are that this will also be a good cruise year. Last winter the western Mediterranean in her all-white dress and with her gayly decorated rooms, enjoyed enormous popularity in her West Indies' newly furnished, she will make similar short "sea-breeze" cruises to the West Indies from New York, commencing July 21.

On June 28th the Camilla will make a cruise from New York to the North Cape and Russia. Short cruises to the Saguenay, Quebec, Munay Bay and Bermuda will also be made on the California, Transylvania and Franconia, some cruises including a call at the Bay of Islands in Newfoundland.

One of the most popular cruises will probably be that made by the Franconia on September 18th from New York to South America. Under the joint management of Thos. Cook & Son, American Express Co. and the Cunard Line, this cruise will carry hundreds of Canadian and American pilgrims to attend the Eucharistic Congress being held that year in Buenos Aires. Calls will be made at Havana, Trinidad, Rio de Janeiro, en route to and from the Argentine Capital.

The popularity of the short cruise in Britain has been phenomenal. This will see an extensive programme of such sea excursions from Liverpool, Glasgow, and Southampton to the Atlantic Isles, and the Mediterranean and around the British coasts.

The semolina of the Rubanka Otawa is a variety of wheat is valued highly for the manufacture of macaroni.

Little Helps For This Week

"Obey my voice and I will be your God and ye shall be my people; and walk ye in the way that I have commanded you, that it may be well unto you." Jeremiah 7:23

And oft, when in my heart was heard
Thy timely mandate, I deferred—
The task, in smoother walks to stray;
But Thee I now would serve more strictly, if I may.
—W. Wordsworth.

"Pray Him to give you what the scripture calls 'a perfect heart,' and without waiting begin at once to obey Him with the best heart you have. Any obedience is better than none. You have to seek his face; obedience is the only way of seeing Him. All your duties are obediences. To do what He bids is to obey Him; and to obey Him is to approach Him. Every act of obedience is an approach, an approach to Him who is not far off though He seems so, but close behind, just a visible screen of things which hides Him from us." J. H. Newman.

As soon as we lay ourselves at God's feet we have enough light given us to guide our own steps; as the foot-soldier who hears nothing of the commands that determine the course of the great battle he is in, but hears plainly enough the word of command which he must himself obey. George Eliot.

One of the private gifts to Great Britain's new cruiser Neptune, is a painting of the Neptune that fought at Trafalgar.

Melvin Notes

Mrs. L. Letard of Peace River is visiting her sister Mrs. Landeen.

Miss Lillian Kynel is spending a few days with Mrs. Emil Krebs.

Mrs. Shaw of Calgary is visiting her father Mr. Chas. Foss.

Mr. and Mrs. Otto Krebs visited the southern city on Tuesday.

Miss Walker of Carbon visited Miss Marian Johnston this week.

Mrs. Chas. Youngs spent last week with Mrs. J. Adams, Spring-side.

Mr. Sid O'Brien and Miss Corn visited Mr. and Mrs. Geo. Youngs on Tuesday.

Miss Sophie Daniels of Calgary is the guest of her sister Mrs. L. Carlson.

Those on the red side of the Go. Getters Club entertained the 'Blues' to a picnic last Saturday at their grounds. A good time reported.

New Deputy Minister

E. I. Gray, for some years provincial field crops commissioner, took over his duties last week as deputy minister of municipal affairs, vice R. English, resigned. Mr. Gray is well known in the west as a government executive, and for his work in promotion of crop improvement, and the organization of seed grain relief and grasshopper control.

Obituary.

Robert Raymond McCulloch the infant son of Mr. and Mrs. Walter McCulloch passed away early on Sunday morning at the age of 6 months and 11 days. He leaves to mourn his loss his father and mother and sister Norma.

Funeral services were held Tuesday afternoon at the United Church, Rev. A. J. Mitchell officiating.

HERE and THERE

The Canadian Pacific 42,500-ton Atlantic flagship Empress of Britain completed her world cruise of 20,516 miles last month on arrival at New York and sailed again for Cherbourg and Southampton to be fitted for her normal season sailings between Southampton and Quebec.

An English building, Scotch terrier, two boxes of swan's eggs and four homing pigeons were among the Canadian Pacific Express shipments arriving at Quebec recently aboard the Duchess of York from Liverpool, Belfast and Glasgow.

"With a soundly administered unified system, Canada would be able to anticipate within a reasonable period of time, a balanced railway budget and would be able to finance any justifiable extensions which expanding settlement and development might in future demand." E. W. Beatty, K.C., chairman and president of the Canadian Pacific Railway, declared in a recent speech advocating unification of the two major railways.

LOCAL & GENERAL

Mrs. S. Troyer celebrated her 80th birthday on Monday. We wish her many other birthdays.

Messrs. Lyn Hunsperger and Loyal Snyder left on Monday for a month's vacation at the coast.

Mrs. H. Hull of Edmonton was the week end guest of Mrs. Florence Finlay.

Mr. and Mrs. W. A. Teskey and daughter Helen visited friends here on Tuesday.

Miss Holly Hunsperger wishes to inform her customers that she will be out of town June 25, 26, and 27th.

Mrs. Dr. C. F. Magee of Moscow Idaho and Mrs. E. Shaw of Jasper Alberta are visiting with Mr. and Mrs. McGhee this week.

Mr. and Mrs. W. J. Loader and Mr. Frank Gooding left Saturday for Vancouver where they will spend a three weeks' vacation.

Mr. and Mrs. W. Irwin motored to Calgary last Thursday accompanied by Mr. and Mrs. J. N. Devolin and Miss Grace Irwin.

Community Picnic and Sports at F. Byrt's, Elktion, Friday, June 29. Lunch at 12.30. Please bring basket, cups and spoons. Dance at night to Calgary orchestra. (252c)

The members of the Masonic Order attended the United Church in a body Sunday last. Wor. Bro. S. McCracken of Calgary conducted the services.

McCormick-Deering New All Steel Manure Spreader at the Same Price as the regular old wood spreader. This is a sensation—just like the new mower! (22c)

Messrs. C. Mortimer and T. Johnson represented the local Masonic lodge at the meeting of the Grand Lodge of Alberta at Edmonton last week.

Miss Gladys Owen, who has graduated at the Royal Alexandra Hospital, visited with Mrs. J. W. Hulton on Monday on her way to visit her mother at the C. D. Carver farm.

A local tournament was played on Sunday by the men of the Tennis Club. Alf Brusco and Elmer Evans reached the finals with Brusco winning the set.

Mrs. and Mrs. Jack McCloy left on Sunday for Sylvan Lake to spend a week visiting Mr. and Mrs. Jack Fleury who are camping in the Park.

Jim Cailhness brought in a 20 inch trout on Sunday. He nearly missed it however when it broke his fishing rod and got away. With a lot of men overing and some patience however he managed to land it.

Word has been received that Master Donald Fleury, pupil of Miss Evelyn Liesemer was successful in passing his music examination of the 10th Academy of music, with marks of distinction having obtained 135 marks out of a total of 150.

Miss Edith Hunsperger entertained the Y. W. C. T. U. girls at her farm home on Tuesday evening last. Fifteen of the twenty young ladies present hiked out from town. At the close of a most enjoyable evening a tasty lunch was served by the hostess to the party guests.

Under the auspices of St. Cyprrian's W. A. a Sale of Homecoming will be held and Afternoon Tea served in the Leuzler Block, Saturday, June 23 at 3 p.m., followed by a Business Men's Supper at 6 o'clock. Will W.A. members kindly bring donations. Thank you (242c)

We have a fresh supply of scratch pads now ready. Especially useful for school, store or telephone. 2 for 5 cents—Pioneer Office. ‡
